

ADVANCED HEALTH MANAGEMENT PROGRAMME

Ms. Padayachy

Ms Padayachy is the Oral Health Coordinator, overseeing the dental preventative and clinical programmes for the district and in addition she also assists with the financial coordinating of the 3 community services and combined clinics of the Nelson Mandela Bay Health District.

The course has assisted in putting her views on management functions and styles into perspective. Various tools from the course help her to deal with problems in a more amicable manner enabling her to make more meaningful contributions to the department that she is currently working in.

She praised FPD on their extremely pleasant yet professional manner in handling students' administration. "The culmination of the course at the very special graduation ceremony made my input and sleepless nights all the more significant."

"FPD is providing an essential platform to enhance managers to fully explore their potentials and to become more resourceful enabling them to take their departments to new or higher levels. The dynamics of management is forever changing and FPD is enabling the necessary development of existing managers."
