

ADVANCED HEALTH MANAGEMENT PROGRAMME

Mr. Peter Mangena

Mr. Mangena is a Senior HIV/AIDS Advisor at Eskom.

AHMP allowed him to look at health issues holistically by incorporating all skills acquired.

Peter is hoping that FPD will soon be able to offer Masters programmes.

"The course improved my project management skills from a health and wellness perspective. Most previous courses on project management tend to have an engineer element attached to it. The AHMP focused on what we had to do daily and it was easy to relate to the classmates' personal examples. The course has also improved my leadership skills and the role a leader should play within the Health and Wellness arena"
