

ADVANCED HEALTH MANAGEMENT PROGRAMME

Dr. Yukteshwar Sookrajh

Yukteshwar is a Clinician and Clinic Manager of the Medical Research Council of South Africa- HIV Prevention Research Unit in Durban.

The course has given Dr. Sookrajh the tools to be a far more effective manager. He hopes to move forward in terms of his career and hopefully have a number of doors open for him in order to further advance his career in the health management field.

"FPD provides a very valuable service especially considering the fact that the country is in a crises in terms of health management. The next step would be to attempt to ensure that all managers of health care facilities actually possess a management qualification, in addition to the necessary medical background and experience."
